P.E. 218

Module 6

Project

For much of the semester, you have completed assignments and projects based on various occupations found in the fields of sport, fitness, health, and physical education.

My Career: Athlete Development Specialist

For your final project, I want you to research and find a video (at least 5 minutes in length) of someone that has a career in the same area that you hope to work someday.

For example, if my career goal was to be a golf caddie, the following video would contain a lot of information needed for this occupation.

https://www.youtube.com/watch?v=sjzWR7F00DU

Once you have selected a video (at least 5 minutes long) for the career you would like to pursue, you will need to write a one-page paper (double spaced) **highlighting what you learned from the video that will help you in the pursuit of this career.**

Your submission must include:

1. **The name of the occupation/career that you would like to pursue. (5 points)**
2. **The link for the video you selected (at least 5 minutes long). (15 points)**
3. **A one-page paper highlighting the video highlight contents. (30 points)**

Your submission must not exceed 30% similarity or contain AI generated work when submitted into Turnitin.com.
